DETAILED ACTION

1. A telephone call was made to Joseph Williams on 4/10/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 12-14, drawn to an antibody specifically immunoreactive with a mCREBa polypeptide comprising the amino acid sequence of SEQ ID NO:2 and a hybridoma; classified in Class 530, subclass 387.3, and 391.1.
 - II. Claim 15, drawn to an anti-idiotypic antibody specifically immunoreactive with the antibody that specifically immunoreactive with a mCREBa polypeptide comprising the amino acid of SEQ ID NO:2; classified in Class 530, subclass 387.2.
3. Groups I and II are different products. Antibodies and anti-idiotypic antibody to the antibody of Group I differ with respect to their structures and physicochemical properties; therefore each product is patentably distinct.
4. These inventions are distinct for the reasons given above. Further, even though the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods of use comprising distinct method steps. Therefore restriction for examination purposes as indicated is proper.
5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (703) 306-3472. The examiner can normally be reached Monday through Friday from 8:00 AM to 4:30 PM. A message may be left on the examiner's voice mail service.
